

# Plot matrix

- `ggplot::facet_wrap()`
  - Display small multiple plots in a grid
  - Display the same style plot using different subsets of data
- `ggmatrix`: Display **different** plots in a grid
- `ggpairs`: Display **every column pair** of data in a grid
- `ggduo`: Display **two sets of columns** of data in a grid
- `ggnostic`: Display **model data vs model diagnostics** in a grid

# Plot matrix
