Plot matrix

- ggplot::facet_wrap()

  - Display small multiple plots in a grid

  - Display the same style plot using different subsets of data

- ggmatrix: Display **different** plots in a grid
  2015

- ggpairs: Display **every column pair** of data in a grid
  2010

- ggduo: Display **two sets of columns** of data in a grid
  2016

- ggnostic: Display **model data vs model diagnostics** in a grid
  2016

ggmatrix

```r
plotList <- list()
for (i in 1:6) {
  plotList[[i]] <- ggally_text(
    paste("Plot #", i, sep = "")
  )
}
ggmatrix(
  plotList,
  2, 3,
  c("A", "B", "C"),
  c("D", "E"),
  byrow = TRUE
)
```
